

ORPHEUS

Orpheus is the leading threat intelligence and cyber risk rating company and is trusted by major organisations worldwide to help protect their vital assets.

Our powerful and award-winning platform collects huge volumes of cyber threat data which we analyse using Machine Learning and an array of sophisticated technologies combined with our highly-skilled analysts.

Our cloud-based platform seamlessly fuses our threat intelligence and cyber risk rating expertise to match your current threats to your live vulnerabilities so that you can stop cyber risks before they happen.

Threat Intelligence

The Problem

- Cyber threats are constantly evolving, and organisations need to understand who is likely to attack what and how if they are going to stand a chance of defending against adversaries.
- In order to understand them it's necessary to collect and analyse huge volumes of disparate information.
- Traditional Cyber Threat Intelligence providers focus on providing huge volumes of data to their clients, but not the understanding that makes the data useful.
- Most organisations have limited internal analytical teams and don't have the time or resources to make sense of huge volumes of data.

The Solution: A subscription to the Orpheus Threat Intelligence Platform

With a subscription to the Orpheus' Threat Intelligence platform you receive a complete understanding of your cyber risks at the strategic, operational and tactical levels.

Understanding which is:

ORPHEUS

Our Threat Intelligence platform helps supercharge the efforts of security teams by giving the answers to vital questions like:

Threat Intelligence

Tactical Intelligence

- What are the current techniques, tactics and procedures being used by threat actors?
- How are these attack techniques evolving?
- What does this mean for your organisation?

Operational Intelligence

- Is my organisation being targeted by threat actors?
- Is my data available on the deep and dark web?
- Are threat actors able to target your infrastructure or the technology you rely on?

Strategic Intelligence

- How can I inform my board of this changing threat landscape?
- What is the potential impact on my business?
- How does the changing threat affect strategic business decisions?

ORPHEUS

Threat Intelligence

Our All-Source Intelligent Model

Orpheus sets itself apart from other traditional Cyber Threat Intelligence providers by collecting data from an unrivalled breadth of sources, which we fuse together with expert insights from our analysts to provide our clients with a real-time invaluable understanding of the cyber threats they face.

Orpheus is so much more than just a threat intelligence platform. Our mission is to turn data into actionable insights so that our clients can clearly visualize the threat and understand the intent and capability that their adversaries have to target them given factors such as:

- Who they are
- What they do
- Where they operate
- The technology they rely on

We empower our clients to ensure they have the right defences in place to successfully protect against their threats and mitigate their cyber risk effectively.

Our Key Points of Difference:

Tailored Analysis

We are not just another data provider. Our proprietary intelligence platform and all-source collection and analysis model sets us apart from our peers. We recognize that no two companies are the same. And we work with you to understand your requirements to ensure we deliver actionable and predictive intelligence that is bespoke to you.

Sophisticated Technology

Our sophisticated technology enables us to collect, index, store and analyse huge volumes of cyber threat intelligence from a wide range of sources, both technical and non-technical.

We use our award-winning advanced analytical techniques, including machine learning, combined with our highly-skilled analysts to provide predictive and actionable intelligence to our clients.

BANK OF ENGLAND

TBEST

Personalised Reporting

We recognize that our clients need their reporting in a number of different ways, and we offer different levels of access - whether your role requires threat data, analysed threat intelligence reports or more strategic management-level reporting. This has all been expertly and carefully designed to empower organisations to respond faster and reveal unknown threats before they impact on business.

Integrity

Orpheus takes its legal and ethical obligations associated with collecting information very seriously. Not only do we follow law enforcement best practice and relevant legislation, but also operate our own high standards set out in our internal policies and training of relevant employees.

A Leader in Cyber Threat

Orpheus has a wealth of experience in providing ground breaking cyber threat intelligence services. We are among the best in the world at what we do, and have the corporate accreditations, individual certifications, and the reputation to prove it.
